SKIN SAVER TIPS

1.

Anti-Oxidant Serums Are Your Skin's Best Friend

If you are not already using an antioxidant serum now is the time to start. Antioxidants are needed to mop up the free radical damage caused by UV exposure. Speak to your therapist about the right blend of Antioxidants for your skin.

2.

Have A Facial

Nothing spruces up a dull complexion like a good facial treatment. Also it's a great time to make some changes to your skincare regime. Why not get started today with our amazing Vitamin C facial offer?

3.

Don't Forget Your Hands

Your hands are the first part of your body to show serious signs of ageing. We wash our hands 10+ times a day. You always apply moisturiser to your face after cleansing your face so why not your hands? Dermaividuals DMS Hand Cream locks in Moisture without feeling greasy, protects from environmental influences and leaves hands feeling soft and smooth.
